DETAILED ACTION

Election/Restrictions

1. In view of Applicant's extensive amendment to the claims and addition of new claims 25-27 in the response filed February 14, 2007 (hereinafter 'Response') to the Office Action mailed November 15, 2006, an election of species is now required.
2. This application contains claims directed to the following patentably distinct species:

An election is required for Y and Z of the first segment of the block copolymer formula recited in claim 1:

Y = - O -, - S -, - CO -, -- SO₂ -, - C(CH₃)₂ -, - C(CF₃)₂ -, diphenyl methylene, diphenyl silicon, fluorenyl or a bond directly to the next aromatic ring.

Z = halogen (F, Cl, Br, I), - NO₂ - or - OH -.

There is no election of species required for Q.

An election is also required for X and G of the second segment of the block copolymer formula recited in claim 6:

X = - O -, - S -, - CO -, -- SO₂ -, - C(CH₃)₂ -, - C(CF₃)₂ -, diphenyl methylene, diphenyl silicon, fluorenyl or a bond directly to the next aromatic ring.

G = halogen (F, Cl, Br, I), - NO₂ - or - OH -.

Art Unit: 1712

3. The species are independent or distinct because the listed substituents for Y and X have varying degrees of steric hindrance and/or different functionality providing for distinct chemical properties to the block copolymers. The listed aromatic substituents for Z and G have varying degrees of electron-withdrawing or electron-donating properties providing distinct physical properties to the aromatic components of the block copolymer.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed. Applicant is advised that a reply to this requirement must include an identification of each species for Y, Z, X and G that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election. Currently, there are no generic claims (although claims 6, 15 and 24 are "generic" for species of "X"; and claims 16, 22 and 23 are "generic" for species of "Y"; there is no claim encompassing all the recited species in the instant claims for both X and Y).

4. Upon the allowance of a generic claim, Applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

5. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the

Art Unit: 1712

requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should Applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if Examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

7. In order to expedite prosecution of this application, Examiner notes at this time that claims 7, 8, 9 (*claims?*) and 12 raise 35 U.S.C. 112, second paragraph, issues due to depending from cancelled claims. New claim 27 also raises indefiniteness issues because the list of species for the substituents recited in the body of the claim does not correspond to the chemical structural formula depicted in said claim.
